DETAILED ACTION

Upon further reconsideration of applicant's invention in light of the amendment and arguments, examiner determined a restriction requirement is needed for the two distinctly claimed species.

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Species A, the sensing system is measuring one physical parameter from a response of the second value of the first physical parameter (Please see newly added claims).

Species B, the sensing system is measuring two physical parameters from a response of a value of the second physical parameter (Please see newly added claims).

The species are independent or distinct because the measurement of one or two physical parameters are depending on the structural limitations of the first and second sensors responding in accordance to interrogated signal which corresponds to the measured one physical parameter or two physical parameters.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 14 is generic.

Applicant is advised that a reply to this requirement **must include an identification of the species that is elected consonant with this requirement, and a listing of all claims**

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Conclusion

For expediting prosecution purposes, examiner respectfully points out that applicant's remarks are silent to citing the disclosure to show supports to the claim amendment (Please see 37 CFR 1.53).
